March 2011, ready for the first game

MicroPel has been a part of my maintenance plan here at TOYOTA PARK for the last 3 years and has helped me grow some of the best turf. I am getting more and more compliments on the condition, playability and color of both the game field and practice field. On July 24, 2011 England's Manchester United Football Club used our practice field for a training session and complimented the field saying it was the best they had seen in America. MicroPel has helped me reduce the amount of NPK that I use, it also has reduced the amount of over seeding I do and has helped me grow more mature and stronger grass plants. The 2 fields that I maintain are much more able to handle the stress of wear and disease. I have one goal mouth that is shaded by the roof of our permanent stage I have resodded this area as much as 3 times a year and in 2011 I only resodded this area once and I believe that it is due in part to my use of MicroPel. I would highly recommend making MicroPel part of your maintenance plan.

Eric Adkins
Turf Manager, Toyota Park
