

Seed Starter Special

Seed Starter Special 16-45-7^{PLUS} is specially designed as a starter solution which promotes faster seed germination and root development on seeds and transplants, without burning. It will promote faster germination time by as much as 40% depending on species. Use as a watering-in solution on transplants.

Hydro Seeding Rates of Coverage - Use 75 lbs. to 150 lbs. per acre in enough water to insure even coverage, or if coverage in square feet per tank load is known use the following formula: Square Feet of Coverage per tank load X .0017 to .0035 = lbs. of fertilizer needed per tank load. Mix in Hydroseeder with seed and mulch and apply any time conditions are favorable for seed germination. If mixing in combination with insecticides or fungicides, always prepare the solution of chemicals first and then add the fertilizer as the last ingredi-
