

Brandt Defoamer

Features

- Aids safety
- Designed specifically for defoaming agricultural spray tanks
- Economical and non-toxic

BRANDT DEFOAMER is a highly concentrated, high strength silicone emulsion defoamer which kills foam in it's tracks, and prevents the reforming of foam.

Agricultural spray tank solutions may contain various hazardous substances that may generate foam. If the foam were to overflow the tank on areas not meant for these chemicals, damage may occur.

BRANDT DEFOAMER solves the problem by stopping the foam, and preventing it from reforming. The use of BRANDT DEFOAMER also speeds up the filling of tanks by not having foam to contend with.

Directions for Use

To Kill Existing Foam

Stop tank agitation, and add BRANDT DEFOAMER across the surface of the foam. When foam starts to drop, restart agitation. Usually 1-2 ounces of BRANDT DEFOAMER will be effective per 100 gallons of solution. If foam persists an additional 1-2 fl. oz. may be required. Rates of BRANDT DEFOAMER may vary depending on type of agitation, chemicals being used and water quantities.

To Prevent Foam Formation

Add water to tank first, add 1/2 to 1 ounce of BRANDT DEFOAMER while agitator is running to ensure even dispersion, then add the other chemicals to tank.
