★'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

★★★★★	Close Mowing	★★★★★	Genetic Color
★★★	Shade Tolerance	★★★	Rust Resistance
★★★★★	Turf Density	★★★★★	Leaf Spot
★★★★	Spring Greenup	★★★★	Dollar Spot

- Tested as J-1466, this new Jacklin Seed variety is the latest improved release from the proven *Chicago* Kentucky bluegrass (*Poa pratensis*).
- *NuChicago* exhibits excellent turf quality whether mowed at a 0.5" fairway cut or a 3" homeowner cut. A top statistical performer in all 3 NTEP maintenance regimes.
- Featuring exceptional season long turf density, *NuChicago* is an exceptional performer in both the transition and northern central turf zone.

PERFORMANCE HIGHLIGHTS

Elite #1 Rated Turf Quality: Exhibiting a beautiful dark green color and medium-fine leaf texture, *NuChicago* is tied as the #1 rated variety for the 2006 NTEP overall turf quality trials at high maintenance (Schedule 'A').

Exceptional Turf Density: In the most recently released NTEP data, 2006, *NuChicago* exhibited top statistical turf density for all three growing seasons; spring, summer, and fall. This high density naturally improves resistance to weed populations, especially at lower cutting heights.

Excellent Wear Tolerance: Placing in the top statistical groups at both Wisconsin and New Jersey, *NuChicago's* ability to withstand wear makes it a strong choice for golf, sports turf, and recreational uses. A real plus for sod production's heavier maintenance equipment.

Strong Disease Resistance: *NuChicago* features very good overall disease resistance, including excellent resistance to leaf spot, dollar spot, and good resistance to rust.

Fairway to Residential Turf: Few bluegrasses exhibit top quality regardless of mowing height, however, *NuChicago* does just that. Be it a component in a fairway blend or elite homeowner mix, you can depend on excellent performance, mown high or low.

Ideal for Blends and Mixtures: Whether blended with other elite Jacklin bluegrasses or mixed with top performing Jacklin perennial ryegrasses or turf-type tall fescues, *NuChicago* adds both quality and top performance. For Kentucky bluegrass blends seed at 2-3 lbs / 1000 sq ft (10-15 gms /m²). With perennial ryegrasses mix to suit, with 80-90% *NuChicago* ideal. With tall fescue, 10-15% *NuChicago* provides improved density and texture.
