MELTS TO -5°F!

Still need an exceptional ice melter without the high price tag? THAW MASTER and AMC, the catalyst that ignites melting power, team up to offer a fast, sustaining melting action without the outrageous cost. THAW MASTER is the economical choice, yet remains extremely productive even in the worst weather. AMC, calcium chloride & magnesium chloride, three high-powered raw materials, combine to quickly generate heat and draw moisture from the air to ensure a speedy thaw even at temperatures as low as -5°degrees. Applying too much product leads to major headaches, which is why THAW MASTER is dyed green, making the spreading and placement of product easier. This allows the end-user to place the product where it needs to be placed and in the correct amounts, therefore minimizing damage to vegetation and also cutting down on damage to concrete. If a safe, clear, clean surface and workable budget is what you need, THAW MASTER is the ice melter for you!

CONTAINS:

EC Grow has successfully established a formula all its own to bring one of the fastest acting and safest liquid de-icers to the granular market. AMC, the catalyst that ignites melting power, is an innovative product added to THAW MASTER that dramatically increases the speed and performance of the ice melting crystals. AMC is a specially formulated liquid product that is safe to you and the outdoors and is unique to the ice melting industry. AMC elevates THAW MASTER to a class all its own!

NOW WITH AMC

Don't wait around for your de-icer to start working.....speedy action is key when using a de-icing product. Thaw Master, along with AMC, the catalyst that ignites melting power, team up to assure a fast and cost effective thaw down to -5 degrees.

• COLD WEATHER POWER

THAW MASTER's concentrated crystals start working right away to melt snow and ice even when the temperature gets as low as -5°F.

• MULTI-INGREDIENT ACTION

THAW MASTER's blend of ingredients generates a synergy giving you more melting power than each ingredient individually.

• GREEN DYE

A water soluble, non-staining food dye is added to THAW MASTER to aid in visibility during the application process. The green color makes the spreading process easy and greatly reduces the odds of over-application, which can be detrimental to surrounding vegetation and poor quality concrete.

• SAFE TO THE OUTDOORS

THAW MASTER will master winter's worst snow and ice, but is safe to vegetation and wildlife when used as directed.

• SAFE ON CONCRETE & TREATED WOOD

THAW MASTER doesn't contain any ingredient that will chemically alter or damage air entrained quality concrete or treated wood when used as directed.*

• CLEAN, NO RESIDUE

THAW MASTER breaks down to a colorless and odorless liquid so it doesn't leave a white film or slippery oily residue on shoes, sidewalks, driveways or carpets.

• NO HASSLE STORAGE & HANDLING

THAW MASTER has an unlimited shelf life and needs no special storage or handling.

***DIRECTIONS:**

Spread at the rate of about 1/4 cup per sq. yd. Leaves no messy white residue to coat sidewalks or to be tracked into buildings. Remove the slush immediately to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. Will not harm carpet or floors.
