

# CADDIESHACK II

## PERENNIAL RYEGRASS

### ATTRIBUTES

☆'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

- ★★★★★ Winter Color
- ★★★★★ Winter Survival
- ★★★ Low Fertility
- ★★★★★ High % Coverage

- ★★★★★ Brown Patch Resistance
- ★★★★★ *Bipolaris* Leaf Spot Resistance
- ★★★★★ Pythium Blight Resistance
- ★★★★★ Red Thread Resistance

### PERFORMANCE HIGHLIGHTS

**WINTER PERFORMANCE:** Bred in North Idaho, **Caddieshack II** exhibits excellent performance during the winter. It tied for #1 for least winter damage in Minnesota (NTEP 06-1 report). In addition, **Caddieshack II** had superior winter survival at two locations when many varieties had severe stand loss.

**DISEASE & PEST RESISTANCE:**

**Caddieshack II** fights the browning caused by many common turf diseases with its great disease and pest resistance against a broad spectrum of diseases. **Caddieshack II** exhibits high resistance to brown patch, *Bipolaris* leaf spot, pythium blight and red thread as well good resistance to other common turf pest and diseases.

**HARDY WEAR RESISTANT TURF:** Tested in university wear trials, **Caddieshack II's** performance was comparable with the best.

**WIDE RANGE ADAPTATION:** **Caddieshack II** with a rich dark green color, medium fine leaf texture and good density has good performance at different maintenance regimes-high, medium, and low input, and varying heights of cut. **Caddieshack II**

quickly recuperates from stresses. Great winter color retention color makes it a fine addition to mixtures and blends that will be used late in the season. **Caddieshack II** performs best under higher maintenance levels and is adapted to mowing heights from 1/2" to 2" (1.2-5 cm).

**OVERSEEDING:**

**Caddieshack II** is adapted to overseeding on dormant bermudagrass and makes a great addition to perennial ryegrass. Tested in an overseeding trial on dormant bermudagrass at Toscana Country Club in Indian Wells, CA **Caddieshack II** displayed good quality, color and density and can be mown down to putting green heights for overseeding.

**BLENDS WELL:**

**Caddieshack II** is a good choice when used alone or matched with other Jacklin grasses in mixtures and blends for permanent turf in temperate and transition zone climates. Plant at 4-10 lb. per 1000 sq. ft. (20-50 g/m<sup>2</sup>). **Caddieshack II** is adapted to use on golf course fairways, roughs, and tees, sports turf, home lawns, parks, and industrial and school sites.
