

L-93 (Premium) Creeping Bentgrass

L-93 is now gracing the greens, tees, and fairways of top golf courses nationally as well as internationally. Its reputation for being dark, dense, and aggressive has made it a world-renowned name in creeping bentgrasses. Formerly produced by Lofts Seed (ABT), **L-93** is now exclusively part of the Jacklin Seed product lineup.

FEATURES:

- Fine-textured leaves
- Dense, upright growth creating a perfect lie for a golf ball.
- Aggressive establishment
- Excellent winter hardiness
- Adapts well to wide range of mowing heights (1/8" – 3/16")
- Rich, dark green color
- Superb cool weather color retention and spring green-up
- Look for it in the PLS™ bentgrass blend!

PERFORMANCE CHARACTERISTICS:

- Outperformed A-1, G-2, A-4, G-6, Providence, Pennlinks, Penncross, and SR1020 in the 1997 final NTEP Bentgrass Putting Green report
- Were you aware 1999 NTEP's rank **L-93** as the #1 bent for FAIRWAYS and TEES?
- The premier bentgrass of choice for genetic color and density

DISEASE RESISTANCE:

Exceptional resistance to dollar spot, *microdochium* patch and warm season brown patch; good resistance to *fusarium* patch and leaf spot.

ADAPTATION:

It's truly a simple choice; **L-93** is ideally suited for use on greens, tees, and fairways. It is widely adapted for use across North America from the cool, temperate regions to the transition zones in the Midwest and Southern U.S. **L-93** is an ideal choice in Europe, South America, North Asia, Australasia and the Pacific Rim. The worldwide choice for bentgrass!
