★★★★★	Heat Tolerance	★★★★★	Leaf Spot
★★★★★	Turf Density	★★★★★	<i>Poa annua</i>

- **“Looking for #1?”** Nu Destiny ranked first in quality in the 2000-2006 NTEP test trials
- Fast, vigorous germination and super-premium performance, even in the Transition Zone
- Proven quality performance in years of university trials and on lawns around the world
- **Nu Destiny** takes bluegrass to a whole new level

PERFORMANCE HIGHLIGHTS

WHAT MAKES A VARIETY #1?: Nu Destiny takes disease resistance to new heights, particularly against bluegrass' common cold – summer patch – in which it scored #1 resistance in North American university trials. Nu Destiny also ranked above the others against necrotic ring spot, leaf spot, red thread, Microdochium pink snow mold, brown patch, spring melting out, anthracnose, stem rust, dollar spot, and stripe smut. And it tied for #1 against bluegrass billbug. Better resistance means fewer chemicals and a greener turf all year 'round.

SOLID DENSITY: Nu Destiny produces a strong, thick, dark green turf that naturally excludes weeds.

FIRM FOOTING: Nu Destiny's vigorous underground rhizome system holds tight when other bluegrass varieties buckle from wear and shear. Shear strength and traction tests at the University of Massachusetts placed Nu Destiny among the top varieties for sports shear resistance. For athletic turf, this means more green turf, less bare ground.

FAST GERM: Nu Destiny germinates reliably for quick coverage.

POA's NATURAL ENEMY: Nu Destiny's aggressive nature crowds out invading annual bluegrass (*Poa annua*). In university trials in New York, New Jersey, and Massachusetts, Nu Destiny ranked among the top Kentucky bluegrasses at fighting *Poa*.

WIDE ADAPTATION: Nu Destiny is one of the few bluegrasses to excel in virtually every cool-season environment. Nu Destiny outperforms nearly every other variety in the US Northeast, Midwest, Great Plains, and Transition Zone. It excels from low-mow fairway mowing heights to low upkeep home lawns.

FINE BLADED: Nu Destiny is among the three finest textured Jacklin varieties.

SUN AND SHADE: Nu Destiny shines in sun or shade. In a shade study at the University of Kentucky, Nu Destiny scored among the top varieties.

BLENDS WELL: Nu Destiny's rich color compliments all Jacklin grasses. Plant it at 2-3 lbs./1000 ft² (10-15 g/m²) with other bluegrasses. Mix it with ryegrass at 80% Nu Destiny, or with tall fescue at 20% Nu Destiny.
