

RAMBO

KENTUCKY BLUEGRASS

ATTRIBUTES

★'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

★★★★★	Close Mowing	★★★★★	Summer Patch
★★★★★	Shade Tolerance	★★★★	Dollar Spot
★★★★★	Low Fertility	★★★★★	Leaf Rust
★★★★★	Heat Tolerance	★★★★	Leaf Spot
★★★★★	Turf Density	★★★★★	<i>Poa annua</i>

- **Rambo** offers stronger spring greenup, shade tolerance, mildew and rust resistance.
- Ideal for sod: Excellent sod strength, rapid rhizome spread.
- Tested for quality and turf performance in US/Canadian university trials for over 10 years.
- Trusted by turf managers the world over for premium performance, superior consistency.

PERFORMANCE HIGHLIGHTS

PEST FIGHTER: In NTEP tests, **Rambo** was one of the top scoring varieties against summer patch, stripe smut, bluegrass billbug, stem rust, melting out, powdery mildew, chinch bug, dollar spot, and pink and *Microdochium* snow mold.

FAIRWAY BLUEGRASS: **Rambo** has strong performance at close mowing; placing among the top four national varieties at mowing heights below 1 inch (25 mm). Its density helps keep a lid on *Poa annua* encroachment.

GOLF QUALITY LAWNS: **Rambo** brings that *golf course look* to your lawn, park, or sports field. Its lush green color and ground-filling growth help crowd out weeds. **Rambo** excels at sports field and home lawn mowing heights, with or without irrigation.

MADE IN THE SHADE: **Rambo** shatters the rule that says dark green bluegrasses don't make it in the shade. It's one of the best varieties available for avoiding iron chlorosis – the yellowing often encountered in the shade.

IT'S DENSE: **Rambo** performs like Limousine in a lot of its qualities, and can be used as an acceptable substitute. In test trials, **Rambo** beats Limousine in overall turf quality and disease resistance. **Rambo** is dense throughout all seasons: Spring, summer, and fall.

WINTER TOUGH: **Rambo** placed among the top four bluegrasses in frost tolerance in US/Canadian test trials. It has good coldhardiness, spring greenup, and scored strongly in trial locations in the cool-humid region.

BROAD ADAPTATION: **Rambo** has been successfully used on some of the top golf courses the world over. You can have confidence **Rambo** will perform for you. In refereed test trials, it ranked "top-10" in Michigan, Indiana, Illinois, Mass., Oklahoma, Ohio, and Pennsylvania.

BLENDS WELL: **Rambo's** rich color compliments all Jacklin grasses. Plant at 2-3 lbs./1000 ft² (10-15 g/m²) with other blues. Mix it with ryegrass at 80% **Rambo**, or with tall fescue at 20% **Rambo**.
