SUSTANE®

Naturally...

SUSTANE:

Since 1987, Sustane has been proud to be a part of the global movement toward a more sustainable world: better land management; protection of our waters; saving and rebuilding soils; improving crop health and yields; helping professional growers, home gardeners, and communities alike -- all through the utilization of recycled, renewable, natural resources.

Sustane Natural Fertilizers are supported by over 25 years of independent research. This is why professional growers worldwide trust in Sustane for the production of certified organic crops, establishment and maintenance of high quality sports fields, help in stabilizing soils with new vegetation in environmentally sensitive areas, and to produce beautiful, sustainable parks, lawns and landscapes.

Uses and Application Rates:

Cantidades para el uso y la aplicación:

Sustane 8-2-4 All Natural Lawn & Landscape Plant Food is a slow release nitrogen fertilizer that provides lasting plant nutrition from biologically stable compost, natural potash and feather meal. This product is recommended for use on lawns and landscape areas as well as trees, shrubs, flowers, fruits, vegetables and all plant varieties.

This product is allowed for use on organically managed lawns and landscapes.

Aprobado para el uso en la producción de frutas y vegetales orgánicos

Lawns & Turfgrass Maintenance: Broadcast 10 lbs of Sustane for every 1,000 ft² of turfgrass

(6.2 kg per 100 m²). Apply 2 to 4 times per year in early spring, late spring, and autumn.

Mantenimiento y trasplante de césped: Distribuir 10 libras de Sustane por cada 1.000 pies² de trasplante (6.2 kg por 100 m²). Colocar 2 a 4 veces por año al comienzo y final de la primavera y el otoño.

Turfgrass Establishment (Seed & Sod): Broadcast 12.5 lbs of Sustane for every 1,000 ft² prior to planting (7.75 kg per 100 m²). Incorporate into the top 2" (5 cm) of soil. Reapply in 30 to 60 days.

Establecimiento de pasto (semilla & trasplante): Distribuir 12,5 libras de Sustane por cada 1.000 pies cuadrados antes de plantar (7,75 kg por 100 m²). Incorporar en las primeras 2 pulgadas (5cm) de la superficie de la tierra. Repetir la operación en un periodo de 30 a 60 días.

New Garden Bed Preparation: Apply ½ cup Sustane for every 10 ft² of bed space or 1.5 lbs. per 100 ft² (63 grams per m²). Incorporate into the top 4" (10cm) of soil.

Preparación para un jardín nuevo: Colocar ½ taza de Sustane por cada 10 pies² de espacio o 1,5 libras por 100 pies cuadrados (63 gramos por m²). Incorporar en las primeras 4 pulgadas (10cm) de la superficie de la tierra.

Vegetable Row Crops: Apply ½ cup of Sustane for every 10 ft of row space (23 grams per m).

Cultivo de vegetales en hileras: Colocar ¼ de taza de Sustane cada 10 pies de la hilera (23 gramos por metro).

	Cups per sq. ft.	Pounds per 100 sq. ft.
Tomatoes	1	2.75
Lettuce	3/4	2.5
Cucumbers	1/2	1.25
Peppers	1/16th	0.75

Conversion:

¼ Cup = 34 grams	1 lb. = 3 1/3 cups
½ Cup = 68 grams	1 lb. = 454 grams
1 Cup = 136 grams	1 kg = 7 1/3 cups

Transplanting and Existing Plants: Apply ¼ cup of Sustane into the hole prior to planting transplants or around the base of the plant for existing plants (34 grams per plant).

Application rates for specific plants are available at www.sustane.com.

Plantas de trasplante: Colocar ¼ de taza de Sustane en el pozo antes de plantarla y alrededor de la base para plantas establecidas (34 gramos por planta). Buscar cantidades para plantas específicas en www.sustane.com.

Soil Mixes & Potted Plants: Incorporate Sustane into the potting mix at a rate of 1 cup per cubic foot of mix (12 grams / cubic liter).

Mezcla de tierra & plantas en macetas: Colocar Sustane en la mezcla para macetas en una proporción de 1 taza por pie³ de mezcla (12 gramos/litro³).

Trees and Shrubs: Apply ¼ cup of Sustane for plants with a 2 ft. canopy. Increase rates by ¼ cup for every additional 6 inches of canopy spread (112 grams for 1 meter canopy).

Apply at planting for establishment or in the spring and fall for existing trees and shrubs.

Árboles y arbustos: Colocar ¼ de taza de Sustane para plantas con un follaje de 2 pies. Aumentar la cantidad a ¼ de taza por cada 6 pulgadas de follaje adicional (112 gramos por metro de follaje). Abonar al plantar, y en la primavera y otoño para árboles y arbustos establecidos.

Turfgrass Coverage: 20 lbs covers 2,000 ft². at 0.8 lbs of nitrogen per 1,000 ft².

Cobertura: 20 libras cubre 2,000 pies² de 0,8 libras de nitrógeno por 1.000 pies².

For best results, apply water after application. Application rates vary based on soil conditions, plant species and desired rate of growth. It is recommended to have soil tested prior to applying any fertilizers.
