

# BIOMELT®

## Granular Ice Melt

### Product Data Sheet

**BIOMELT®** is an ice melt product formulated with a blend of rock salt and a specially engineered product made from **Corn**. This unique blend is environmentally friendly and extremely effective at low temperatures. **BIOMELT®** will melt more snow and ice than rock salt. **BIOMELT®** is less corrosive than rock salt. **BIOMELT®** product is colored for easy visibility where applied.

- Works faster than conventional rock salt for increased safety
- Reduced rock salt usage means less corrosion and is better for environment
- Works at lower temperatures effective -20°F/-28°C
- Available in 20lb / 9.07kg, 40lb / 18.2kg and 50lb / 22.7kg bags
- Easy to see blue / green crystals eliminate excess application
- Product does not stain floors or carpets
- Special coating adheres to sidewalks and driveways so ice melt stays in place reducing salt use up to 30%

#### Directions for use:

Evenly spread 1/4 to 1/3 cup of **BIOMELT®** per square yard for sidewalks and driveways.

Melting will begin immediately and the melting action occurs at lower temperatures than standard rock salt products. Thick accumulations of ice will require additional application. For best results remove all loose snow, ice and slush from sidewalk, steps and driveways then apply **BIOMELT®**. Do not use product on concrete less than one year old.

**BIOMELT®** may not damage concrete when used as directed.

The information and recommendations in this publication are to the best of sellers knowledge, accurate. However because of numerous factors affecting test results, seller makes no warranty of any kind, express or implied other than product conforms to its applicable current standard specifications. Statements concerning the use of the products or formulations described herein are not to be construed as recommending the infringement of any patent. SNI Approved 10-04-12
