The Grappler™

Reach and Grab Tool

The US Department of Transportation's go-to litter pick up tool.

When you buy the Grappler you can be assured you will get your money's worth because it's made of **rust-proof aluminum** and **designed to last for years of continued use**. This tool is the choice of Parks and Recreation Departments because of its wide mouth, strong grip, and sturdy rod.

With the Grappler, you will be able to reach areas that you were previously unable to. You will be able get a Frisbee stuck on a tree, get debris out of a prickly bush, and even water hanging flower baskets.

No matter what your need, the Grappler is the reach extension and commercial grade pick-up and grab tool that can help. You will be astonished by how much it can do.

The Grappler Pick Up Tool makes cleanup easier and safer

Outdoor clean up often requires putting your hands or arms into areas that you just don't want to reach into ... a prickly shrub, around dog poop or into a murky pond. Picking up rubbish from outdoor areas is sometimes uncomfortable or even unsafe.

USE FOR

- Litter pick-up
- Unhygienic trash
- Tree debris
- Pet feces

So precise it even picks up items as small as toothpicks!

BENEFITS

- **Safety:** With the Grappler, reaching into previously inaccessible spaces is easy. Don't try to climb or use unstable objects to get into high places. Stay out of prickly bushes or bee-infested trees.
- **Efficiency:** The Grappler is great for mass cleanups or yard pickups. Its ease of use and effective design make picking up faster and more straightforward than ever before.
- **Health:** The Grappler eliminates needless bending over, stretching, and squatting.
- **Durability:** The Grappler is commercially made and made to last. It will withstand the elements without rusting and is designed for hours of hard manual labor.
