- **NuGlade** follows Jacklin Seed’s popular Glade-series of premium bluegrasses.
- Offers the best shade tolerance available in an elite, high performance bluegrass.
- Tested for quality and turf performance in US/Canadian university trials for over 10 years.
- Trusted by turf managers the world over for premium performance, superior consistency.

**PERFORMANCE HIGHLIGHTS**

**FAIRWAY BLUEGRASS:** NuGlade was the first true fairway bluegrass, able to perform at close mowing down to ½ inch (12 mm). In national tests, it excels at mowing heights below 1 inch (25 mm).

**GOLF QUALITY:** NuGlade brings that golf course look to your lawn, park, or sports field. Its luxurious dark green color and ground-filling density help to crowd out weeds. #1 rated at sports field 1-2 inch (25-50 mm) mowing and even at home lawn high mowing with no irrigation.

**SHADE CHAMP:** NuGlade breaks the rule that says dark green bluegrasses don’t make it in the shade. At the University of Maryland dense shade trial, NuGlade ranked 8th out of over 100 contenders.

**#1 DISEASE RESISTANCE:** In NTEP tests, NuGlade smoked the competition against summer patch, Microdochium pink snow mold, brown patch, stripe smut, necrotic ring spot, and anthracnose. NuGlade is one of Jacklin Seed’s best against dollar spot.

**WIDE ADAPTATION:** NuGlade has been successfully used on some of the top golf courses the world over. You can have confidence it will perform for you.

**IT’S A SURVIVOR:** NuGlade ranks among the top 3 bluegrasses in drought (dormancy) tolerance. It shows good wear resistance and only an average thatching tendency.

**SOLID COVERAGE:** According to unbiased test results, NuGlade is top rated for fall and spring density and ground cover, fall color and ground coverage, traffic and wear tolerance, Transition Zone endurance, fewest seedheads in the turf, and sod stretch resistance. Its dense nature fights encroachment of Poa annua.

**WINTER HARDY:** NuGlade tied for #1 for frost tolerance, and ranked favorably in winter color, and against Typhula gray snow mold.

**BLENDS WELL:** NuGlade’s rich color compliments all Jacklin grasses. Plant it at 2-3 lbs./1000 ft² (10-15 g/m²) with other bluegrasses. Mix it with ryegrass at 80% NuGlade, or with tall fescue at 20% NuGlade.
