PERFORMANCE HIGHLIGHTS

GRAY LEAF SPOT RESISTANT: Specifically selected for its resistance to gray leaf spot, Revenge GLX is the most resistant Jacklin variety available earning it the “GLX” designation.

BEAUTIFUL COVERAGE: Revenge GLX has the fine leaf texture and dark green color that highlights any turf setting. It demonstrates great year around density and maintains a high amount of living ground cover.

ALL MOWING HEIGHTS: Revenge GLX is adaptable to mowing heights as low as 7/16” and as high as 2½”. Revenge GLX’s best performance has been under high maintenance (mowing height ½-¾”).

DISEASE RESISTANCE: In addition to gray leaf spot resistance, Revenge GLX has excellent resistance to many common turfgrass diseases including brown blight, pythium blight, brown patch and red thread. Finally, there is a variety that you can plant to get revenge against the major diseases of perennial ryegrass.

BROAD ADAPTATION: Revenge GLX is widely adapted and has outstanding performance in the Transition zone and North Central regions.

COLD TOLERANCE: Revenge GLX has reduced winterkill and excellent cold tolerance enhancing its performance throughout the northern United States or southern Canada.

EXCELLENT SPRING GREEN-UP: In addition to having great winter and cold tolerance, Revenge GLX comes out of the winter months ready to go with superb spring green-up.

SEEDLING VIGOR: Revenge GLX is one of our fastest germinating ryegrasses with excellent seedling vigor to get a jump on the competition.

OVERSEEDING: Revenge GLX is a perfect choice when blended with other Jacklin ryegrasses for overseeding on dormant bermudagrass using rates of 10-30 lbs./1000 sq.ft.
